| unisphre-snowy.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer with a BS in Computer Science (University of Lahore, 2026), focused on React, Node.js, and SQL. I've independently built and deployed three production web applications end to end — from client requirements through CI/CD deployment — including Unisphre, a live campus social platform with OAuth authentication and 10+ REST endpoints. I also apply machine learning where it's useful, including convolutional neural networks. I like owning a project fully and I'm looking to bring that ownership to a collaborative engineering team.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Self-Employed

2024 - Present | Gujranwala, Pakistan

- Built and shipped 3 full-stack web applications for independent clients using React, Node.js, Express, and SQL, handling everything from requirements gathering to live deployment.
- Cut down rework and miscommunication across all 3 engagements by running discovery calls directly with clients and turning their requirements into clear technical specs before writing any code.
- Designed and shipped a production-ready Freelance Job Board with 8+ RESTful API endpoints, full CRUD across users, projects, bids, and reviews, a normalised SQL schema, and JWT-based authentication.

EDUCATION

Bachelor of Science in Computer Science

University of Lahore, Main Campus | Feb 2022 - July 2026

Relevant Coursework: Data Structures, Algorithms, OOP, Database Systems, Web Programming, AI.

Intermediate in Sciences (Pre-Medical)

Punjab College, Gujranwala | Aug 2019 - Aug 2021

TECHNICAL PROJECTS

Unisphre - Campus Social Network (Live: unisphre-snowy.vercel.app | React 19, Node.js, Vite, Vercel)

- Built and deployed a full-stack campus social network with secure auth (email/password + Google OAuth), a personalised feed, society/event discovery, and a jobs board — 10+ RESTful API endpoints across 5 database tables, shipped through CI/CD with Vercel auto-deploy.

AI Handwritten Letter Recognition (Python, TensorFlow/Keras, CNN, EMNIST)

- Trained a convolutional neural network to classify handwritten letters across 47 EMNIST classes, reaching 90%+ test accuracy, and built the full preprocessing, augmentation, and inference pipeline myself.

Freelance Job Board (React, Node.js, Express, SQL - Full-Stack)

- Built the core marketplace flow letting clients post projects and freelancers submit bids, with 8+ RESTful API endpoints, full CRUD across 4 entities (users, projects, bids, reviews), and JWT-based authentication.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, SQL, HTML5, CSS3

Web: React 19, Next.js, Node.js, Express, Vite, Tailwind CSS, REST APIs, Responsive UI, JWT/Google OAuth, Full-Stack

AI / ML: TensorFlow/Keras, CNN, Image preprocessing, EMNIST/MNIST

Databases: SQL, MongoDB, Firebase, schema normalisation

Tools & DevOps: VS Code, Git, GitHub, Vercel, Linux CLI, CI/CD, Postman, Figma, Canva, MS Office

CERTIFICATIONS & LANGUAGES

University of Lahore: Introduction to Artificial Intelligence (Microcredential, Summer 2025)

Innovative Youth Circle (IYC): Job Market Readiness & Data Recovery sessions (2024)

Canva & Figma: 10+ Canva designs + UI/UX pages in Figma

Languages: English (Fluent), Urdu (Native), Punjabi (Native)
